

The User Conference 2016

June 27–30, 2016

Stanford University, California, USA

***useR!* 2016**

The tenth annual meeting of international R user and developer community, will be held in the heart of Silicon Valley on the campus of Stanford University.

The year 2016 is special in at least two ways: it marks the 40th anniversary of the S language, the language underlying R, and it is also the year that John Chambers, an inventor of S, turns 75.

We are especially pleased to have an outstanding group of invited speakers:

- Richard Becker, AT&T
- Donald Knuth, Stanford University
- Deborah Nolan, UC Berkeley
- Simon Urbanek, AT&T
- Hadley Wickham, Rice University & RStudio Inc.
- Daniela Witten, U of Washington

An extensive program of tutorials, panels, invited as well as contributed talks is planned over the 4 days. In addition, an exciting social program seeks to connect all users of R both in academia and industry.

Organizing Committee

- John Chambers, Stanford University
- Sandrine Dudoit, University of California, Berkeley
- Trevor Hastie, Stanford University
- Susan Holmes, Stanford University
- Simon Jackman, Stanford University
- Olivia Lau, Google Inc.
